Position 16

Position 17

Instructions for Page 1 Template if You are a <mark>Low Volume</mark> U.S. LSV Manufacturer who has a six-character WMI Code

*(Note: A **High-Volume U.S. LSV Mfr** can use the same page 1 template but see special instructions in the last paragraph below.)*

Create a similar 3-column template that is on page 1.

Relating to VIN Positions 1, 2, 3 : If your new company does not have a **WMI Code** (World Manufacturer Identifier Code), please obtain one by calling the SAE at **724-772-7107** and identify the type(s) of motor vehicle(s) your company produce(s).

The third column of your template must reflect the characteristics/descriptions of the vehicles your company produces. Only indicate those items that describe your product and give each a letter or number code. **(Note : Never use capitol letters I, O, Q in your coding.)**

In the third column for VIN Positions 4 thru 8, do not simply copy these items. These are only examples. List only the items your company produces and assign each a letter or number code. Again, **Never use capitol letters I, O, Q** in your coding as they are prohibited. DO NOT LIST ITEMS YOU DO NOT PRODUCE !

(Note : In the future, you can always submit a revised or updated PART 565—VIN Decoding chart whenever your company have new additional codes for new additional items.)

For VIN Position 9, you may copy the verbiage in column 3 as the check digit will always change with each new VIN number created for each new vehicle produced. *For more information on the check digit calculation, see pages 17-18 of the 68-page requirements handbook* accessible by clicking the **PDF text** at : **http://www.nhtsa.gov/cars/rules/maninfo/**

In VIN Position 10, please keep these Model Year codes, which are dictated by regulation.
See the chart at the bottom of page 19 of the requirements handbook for additional codes for other model years.

In VIN Position 11, give the City & State for each plant location and assign a letter or number code for each. If you have more than one plant in the same city, please give the complete address for each and assign each a letter or number code.

VIN Positions 12 thru 14 : For **LOW-VOLUME MFR** who is given a six-character WMI Code, please insert the last three characters of your WMI Code here in these three VIN Positions. *[For **HIGH-VOLUME MFR** who is only given a three-character WMI Code which is inserted in VIN Positions 1, 2, and 3, the VIN Positions 12, 13, 14, and 15, 16, 17 are together used to designate a unique **six-digit sequential number** or six-digit serial number for each new vehicle coming off the assembly line.]*
